13 # Exercice 1 : Recherche d'un entier
14 #
15 # On considère un entier n et un entier k. On cherche à savoir si k est un diviseur de n.
16 #
17 # On définit la fonction divisible qui prend en argument un entier n et un entier k.
18 #
19 # La fonction divisible retourne True si k est un diviseur de n, et False sinon.
20 #
21 # Exemple :
22 #
23 # divisible(12, 3) == True
24 # divisible(12, 4) == True
25 # divisible(12, 5) == False
26 # divisible(12, 6) == True
